

Welcome to the Avon Gorge, Clifton Down and Durdham Down

With stunning views and awe-inspring geology, the Avon Gorge's wild and rugged rock faces are home to rare wildflowers, beautiful insects and nesting peregrine falcons.

Close by are the Downs where you can go for a stroll, play football, fly a kite or enjoy a perfect picnic beside wildflower meadows.

Just two miles from Bristol city centre, this is one of the most exciting places to enjoy wildlife in Bristol. What's more it's open all year round and it's free!

Caring for wildlife

The Avon Gorge and Downs Wildlife Project was set up to look after the wildlife of the Bristol side of the Avon Gorge and the Downs.

We have three roles:

- Wildlife surveying and monitoring
- Habitat management
- Education

How to get here

By Bus: the following services all run past the Downs – 1, 8, 9, 40, 41, 54, 586 and 587. For further information visit www.traveline.info or call Traveline on 0871 2002233.

By Train: the nearest train station is Clifton Down Station, 10 minutes walk from the Downs. Visit www.nationalrail.co.uk or call 0845 7484950 for further details.

By Road: follow the map below.

Contacting us

For copies of our nature trail leaflets or events programme, or details of our school and playscheme sessions please contact:

Mandy Leivers, Avon Gorge & Downs Biodiversity Education Officer, The Learning Department, Bristol Zoo Gardens, Clifton, Bristol, BS8 3HA Tel: 0117 9030609 E-mail: mleivers@bristolzoo.org.uk www.avongorge.org.uk | www.facebook.com/avongorge

The Project is a partnership of:

We are also working in partnership with the National Trust who manage part of Leigh Woods on the North Somerset side of the Gorge and the Friends of the Downs and Avon Gorge.

Production of this leaflet was funded by the Downs Committee.

This leaflet is also available in large print and audio CD. Tel: 0117 9030609

Silky wave

In late June and early July, look out for the rare **silky wave moth**. It's only found on two other sites in the UK.

As the crow flies

The Downs are a great place for spotting members of the crow family. Look out for ravens, rooks, carrion crows, jackdaws, magpies and jays.

Unique to the Gorge

Four types of tree, Bristol, Wilmott's, Houston's and Leigh Woods whitebeams, are endemic to the Gorge (i.e. they grow naturally here and nowhere else in the world). You can see some Bristol whitebeams here.

Super speedy

Peregrine falcons have bred in the Gorge since 1990. These spectacularly fast falcons can often be seen from the Peregrine Watch point. Why not pick up a copy of the Peregrine leaflet to find out more about them?

DURDHAM DOWN

River Avon

Seawalls

Many birds come to the Downs to feed. In winter keep your eyes peeled for flocks of migrant **redwing** and **fieldfare**. They particularly like berries on the old hawthorn trees around the Downs.

Ramalina farinacea

Lovely lichens

Winter is the best time to spot strange and beautiful lichens growing on trees. Why not pick up a copy of the Downs lichen trail leaflet to find out more about them?

Famous flora

The Avon Gorge is home to over 30 different kinds of rare plants. For at least 450 years plant lovers have been finding rarities such as honewort, autumn squill, spiked speedwell and little robin on its craggy ledges.

True Bristolians

Did you know that three rare plants living in the Gorge have Bristol in their name? They are Bristol whitebeam, Bristol rock-cress and Bristol onion.

Meadow magic

The large areas of limestone grassland on the Downs are packed full of wildflowers such as bird's-foot-trefoil, oxeye daisy and yellow rattle. Visit in the summer to see them at their best. Don't forget to leave the wildflowers for others to enjoy.

Special designations – what's in a name?

The Avon Gorge is such an important place for wildlife that it has been internationally recognised as a Special Area of Conservation (SAC) and nationally designated as a Site of Special Scientific Interest (SSSI). The Downs are a Site of Nature Conservation Interest (SNCI).
